Java was activated on the device. The New York City Police Department will no longer be asking bystanders to hand over their phones during police stops, the department's top officer announced Wednesday. The "Stop-and-Frisk" policy, which effectively allowed officers to search anyone, regardless of whether they were believed to be engaged in a crime, was declared unconstitutional in a series of high-profile court decisions beginning in 2013. Police Commissioner Bill Bratton said Wednesday that he and his team have been working for months on new guidelines and new procedures to abide by the court rulings. He said a series of pilot programs will go into effect on April 15 to test various aspects of the new policy. "We want to make sure that we're meeting all of the requirements under the law and the court decisions, but at the same time not disrupting the quality of life for New Yorkers or making New Yorkers feel as if they are under the rule of the police," Bratton said in an interview with reporters. Police Commissioner Bill Bratton said Wednesday that the police department will no longer be asking bystanders to hand over their phones during police stops. Andrew Burton/Getty Images He said that when police officers follow specific guidelines they will be allowed to search a person during a stop only if they believe the person is armed and/or dangerous. Officers will also be instructed to ask any person who is arrested to open their phone for an officer to examine their contents. During the investigation of a possible crime, police can also check the phone of any person they are questioning or who is a suspect. Bratton said in his interview that the goal is not to stop all police-citizen interactions. He said his officers will continue to carry out stops that are "reasonable" under the law. Bratton said that, while the police department has taken steps to mitigate the impact of the court ruling, many officers on the streets still believe the old "Stop and Frisk" policy was necessary. "What we want to do is build a stronger relationship with the communities and build a stronger relationship with the public in a new way," he said. The new policy will be implemented in three phases. The first two phases will affect NYPD officers on patrol. 82157476af
